

SLACK & PARR LTD

APPRENTICESHIPS IN PRODUCTION ENGINEERING

Slack & Parr's Engineering Technician Apprenticeship Standard begins at Level 2 which is based in our fully equipped 'In house' training centre. Apprentices then progress to our workshops where they complete the Level 3 competence units.

Our Apprentice training programme takes around 3 years to complete, during this time our Apprentices will attend Learning Unlimited College in Derby to study the knowledge units on a day release basis.

When your apprenticeship is complete, should you pass with merits and distinctions, there is an opportunity to study for a HNC and higher qualifications.

Learning Unlimited
The Derbyshire College Group

Your predicted G.C.S.E. grades for English Language, Maths and a Science subject need to be grade 5 or above for a Slack & Parr Apprenticeship, a G.C.S.E. in ICT would also be advantageous.

If your achieved G.C.S.E. grades are below this, you can still apply for an apprenticeship, but you may be required to pass 'Functional Skills' Level 2 on an additional course held at Learning Unlimited College in Derby.

To secure an interview it would be ideal for you to prove you show an interest in Mechanics and Engineering with a practical outlook.

Once you start our Apprenticeship at Slack & Parr Ltd you will automatically become an employee of the company earning a competitive wage on a progressive pay scheme.

50% of the current work force at Slack & Parr Ltd are ex-apprentices, this giving proof, you are training for a career within the company.

IS MECHANICAL & PRODUCTION ENGINEERING FOR YOU ??
